NEXORAH BUILDS

Where vision meets action.

BUILD · AUTOMATE · SCALE

Nexorah is a web and automation studio founded by George Nnamdi, a Bubble.io developer in Nigeria working with clients worldwide. We build websites, web apps, booking systems and automations that help businesses get found, trusted and chosen.

AT A GLANCE

Small studio. Real results.

5.0 ★ Upwork rating across 5 contracts	**3** Platforms shipped in Bubble.io	**98** Posts published in our 15-day launch	**6** Service lines, from MVPs to AI automation

WHAT WE DO

Six ways we help a business grow

We start with the problem that is costing you customers: people can't find you, don't trust what they see, or your team is buried in messages and spreadsheets. Then we build the fix with you.

Bubble.io web apps

MVPs, SaaS products, marketplaces, booking systems, dashboards and client portals.

APIs & backends

REST APIs, payments and checkout, Xano backends, data sync and webhooks.

Automation & AI

n8n, Make, Zapier and Airtable workflows, plus ElevenLabs AI voice.

Websites & landing pages

Fast, mobile-first sites in WordPress, Bubble.io and GoHighLevel.

UI/UX design

Interfaces and brand visuals designed in Figma and Canva.

Workspace systems

Notion, Airtable and Asana setups that keep a team organised.

Bubble.io · Xano · WordPress · n8n · Make · Zapier · Supabase · ElevenLabs · Airtable · Figma · Canva · Notion · Asana

FEATURED WORK

Platforms we've built

Elysian Dubai

Premium real estate website
January 2026

BUBBLE.IO

- Cinematic, fully responsive hero
- Property search by keyword, rent or buy, type and location
- Custom UI with a conversion-focused layout

Sensei Reservations

Booking system for a luxury wellness retreat
October 2025

BUBBLE.IO · CUSTOM APIS

- Personal matching quiz that recommends the right stay
- Live calendar showing only free dates
- Deposits, payments and confirmations
- Guest and payment data synced automatically

Sixt Car Rentals

Car rental booking platform
April 2025

BUBBLE.IO · SOLE DEVELOPER

- Search by location and date with live availability and pricing
- Pickup and drop-off flow with secure checkout
- Inventory synced through API integrations

LEARNING LAB

Built while learning

Every developer has a practice wall. These are the websites I built while learning Bubble.io: experiments in layout, databases, workflows and responsive design that shaped how we build for clients today.

What you'll find in the lab

1. Practice websites built step by step in Bubble.io
2. Layout and responsive design experiments
3. Database, workflow and logic exercises

Open the learning lab

RESULTS

What clients and the market said

Client reviews

★★★★★ 5.0

> "George has a deep understanding of Bubble.io, SaaS development, MVP development... He communicated clearly, delivered milestones on schedule, and was proactive in solving challenges."
>
> Upwork client · July 2026

> "George delivered an outstanding Bubble.io application with excellent communication, attention to detail, and on time delivery. Everything worked perfectly..."
>
> Upwork client · July 2026

> "He was professional, responsive, and delivered a high quality Bubble.io application that exceeded my expectations..."
>
> Upwork client · July 2026

> "George communicates well, is flexible and always asks questions to make sure he's doing the job right."
>
> Upwork client · September 2026

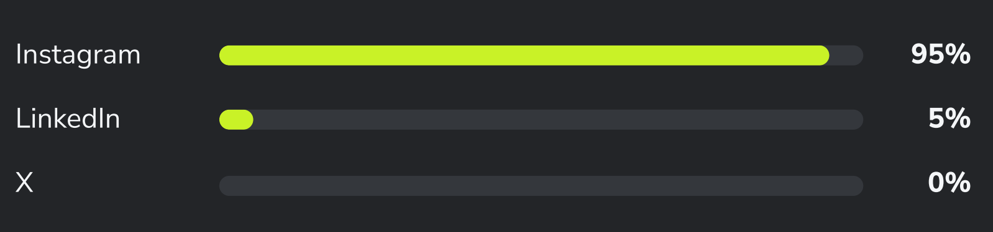
> "I had an excellent experience working with George... he delivered exactly what I was hoping for and more."
>
> Upwork client · February 2026

Launch campaign

2–16 OCT 2026

"5 Free Websites": 15 days, 3 posts a day on Instagram, LinkedIn and X, written to start conversations with business owners.

PLATFORM	POSTS	IMPRESSIONS	COMMENTS
Instagram	30	n/a	18
LinkedIn	34	269	1
X	34	81	0
Total	**98**	**350**	**19**



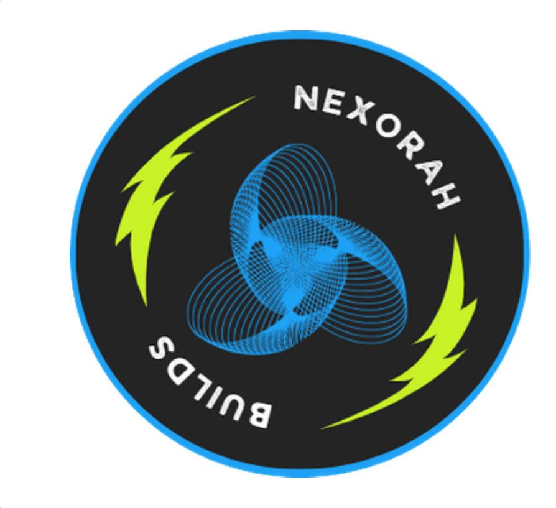
Share of the 19 comments. LinkedIn reached 108 unique people. Instagram impressions are not reported by our scheduler. Source: Buffer analytics, 17 Oct 2026.

What we learned

- Instagram drives the conversation: 18 of 19 comments came from it.
- Easy-answer posts (rate 1 to 10, finish the sentence) earned the most replies.
- Next step is reach: growing the LinkedIn and X audience through daily outreach.

BRAND IDENTITY

Logo, colours and type



The badge: a blue ring and spiral for the systems we build, lime bolts for speed and energy, on charcoal.

LOGO COLOURS

Name	Hex	Use
Charcoal	#242424	Badge, dark backgrounds
Electric Blue	#1EA2F5	Ring, spiral, links
Volt Lime	#C9F227	Bolts, calls to action
White	#FFFFFF	Wordmark, text on dark

EXTENDED PALETTE

Name	Hex	Use
Navy	#03133A	Website base, headlines
Purple	#5B1AEB	Accent words
Violet	#6C3EFC	Buttons on the website
Lime	#DAF50A	Pop colour, never text on white
Soft Lilac	#B9A4FF	Highlight text on navy
Lilac Tint	#EFE9FF	Tags, soft backgrounds

TYPEFACES

Sample	Typeface
Build fast	Saira Stencil One · headlines
NEXORAH	Audiowide · wordmark
Clear & friendly	Nunito Sans · body text
